Dear Customers

Thank you for purchasing our TFT LCD monitor. This product incorporates the new international integrated circuit that powers the high quality TFT & TFD modules. Our monitors feature low power consumption, superior quality screens that produce no X-ray radiation, to reduce eye strain & improve picture quality, plus many other features, and a modern stylish compact design. These monitors are ideal for cars, trucks, buses, boats, airplanes, or anywhere else a mobile display is needed. Ideal uses include mobile video in vehicles, boats, small aircraft, etc. We have designed our products to ensure that you will have years of trouble free enjoyable viewing.

Important Safeguards & Precautions
1. Only use the included power adapters to avoid damaging the electrical components
2. Do not open the unit or remove the back panel. If service is required please call a qualified service technician
3. Do not expose the monitor to direct sunlight, heat, or humid conditions for prolonged periods of time
4. Avoid dropping the unit or any other sudden impact that could damage the unit.
5. For the best picture quality avoid viewing in direct sunlight & keep the screen clean.
6. Do not use chemicals or cleaning products to clean the monitor. Simply wipe with a soft cloth. If it should become soiled wipe with a damp towel and then dry.

If you do not plan to use the monitor for extended periods of time on during thunderstorms unplug the unit as a precaution

Trouble shooting

Only black–and–white image
i. Make the level of color saturation and brightness is proper
ii. Power on but no picture
   Make sure the AV cable are tightly connected from the video out connector. Make sure you are using the standard power adapter
   Coming with the monitor
iii. Wrong or abnormal colors
   If any color is missing, check the cables to make sure it is securely connected. Broken or loose pins in the cable connector can cause a bad connection
iv. Remote controller doesn’t work
   Check the battery to make sure the battery is installed properly and make sure it is not a low battery. The signal is interfered by some obstructions
**Remark:**

1. If there are still any problems you connect with the related deals
2. It is a normal condition that some bright lines appear on the screen when you turn the unit.

**Note:** due to constant effort to improve products and product features, specifications may change without notice.
